

Application for Solar Panels

Provide the following information with your building application:

Address for solar panels _____

Installation type: _____ Ground(not attached to the home) _____ Roof
mounted(attached to the home).

Type or Use: _____ Electrical _____ Hot Water

Quantity of panels: _____ Dimensions of each panel _____

1. A plat or drawing showing the location of the panels on the ground and the direction they will be facing. Note distances from the property lines.
2. Mounting platform can be a maximum of 9'x9' of panel area or 82 sq. ft. and a maximum height of 12' including the mounting system for ground mount solar systems. Ground platforms shall be located in the rear of the property. All ground mount locations must be approved by the "Board".
3. Wiring must be installed in conduit or concealed in a manner to minimize the exposure including mounting hardware. A visual acceptance is the goal.
4. Provide the manufacturer of the panels and pictures of the unit/system. An internet link can be provided here or attached in an email when submitting:

5. If a neighbor can be affected visually by the ground installation then the "Board" will be looking for the applicant to communicate with the neighbor for approval so the neighbor can be a part of the "Boards" decision and be notified that they may attend the meeting.
6. Acceptable locations installed on a structure are: Home, Garage and Shed.
7. Provide the County permit number here _____

*****Wind turbines are not permitted.**
